

Small Pets, Big Fun!

Pet Lovers Centre, Pet Lovers Junior Club and The Pet Safari came together to create yet another wonderful event for young pet enthusiasts on 9 September 2019 @ Nex Mall. This time, the children got an introduction to adorable small animals: hamsters, guinea pigs, rabbits and terrapins.

Pet Care Consultants made a presentation of fun facts about these small wonders. For example: did you know that turtles – being cold-blooded reptiles – require a heat source to keep them warm? Apart from a water heater, aquatic turtles also need platforms to bask – not just to keep themselves warm, but also to get completely dry and prevent shell-rot. After the educational

presentation, our young attendees – more than 25 of them – were split into four teams to go on a scavenger hunt seeking for items such as a guinea pig cage and rabbit food. Members from the two fastest teams won great prizes, but there was something for everybody in the form of goodie bags worth \$20. Yet what was truly priceless for the kids was the opportunity to interact with the small animals – and even have a photo-taking session with them!
